## To Spread Truth About Cuba

The first annual conference of the Fair Play for Cuba Committee in N. Y. City ended with a pledge by both leaders and members to redouble efforts to reach even more Americans with the truth about Cuba.

More than 60 full delegates from Fair Play's 27 chapters across the country attended the conference, the first since the organization was founded 15 months ago. Several hundred fraternal delegates and guests from the U. S. and Canada also attended.

The conference condemned the Kennedy Administration for continuing violations of the U. S. Neutrality Act and international agreements with respect to the sovereignty of Cuba.

The conference also demanded action against those who have violated our Neutrality Laws, including Allen Dulles, head of the CIA.

The conference created a national advisory council to meet semi-annually.
